

Steps for creating an API key

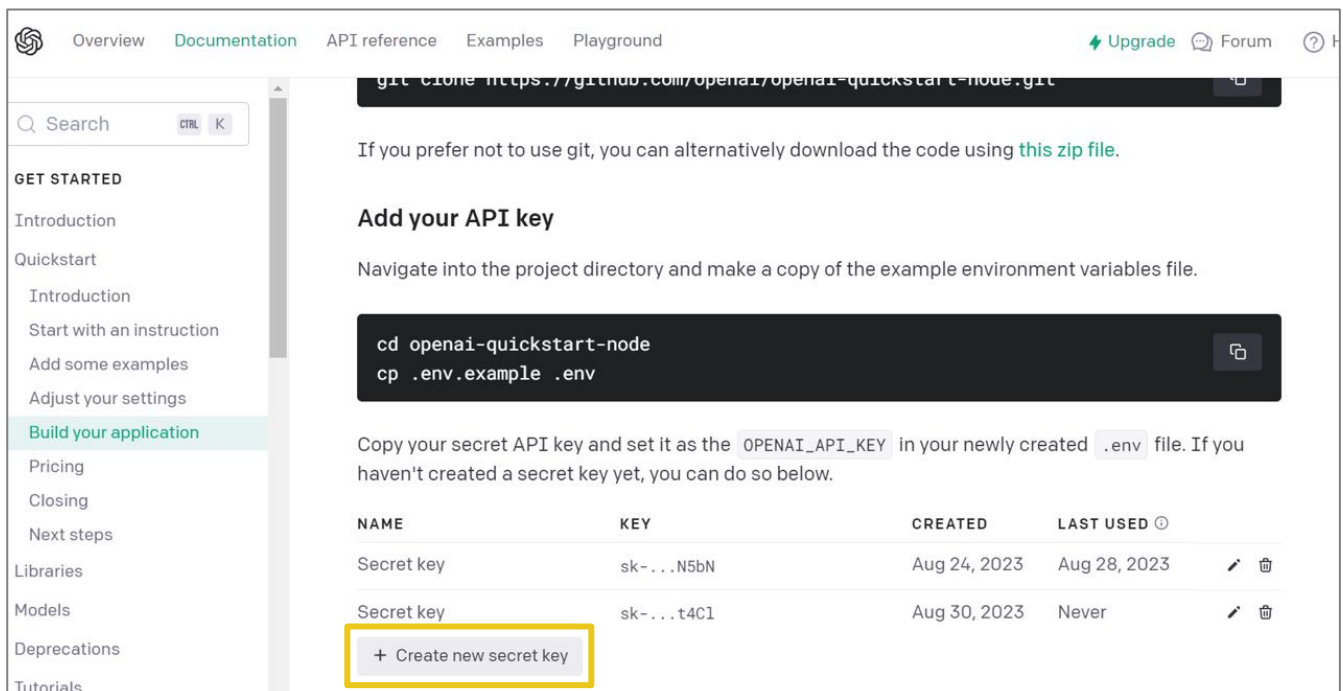

These are the steps for creating an API key.

Step 1 – Use the <https://platform.openai.com/account/api-keys> link to log-in into the platform, using your OpenAI account.

Step 2 – After signing in, you will see a section on this page, where you will create your secret API Key and type the name of the key.

Step 3 – After clicking on the create button, it will create an OpenAI secret key.

Remember:

The key should be kept confidential. It is your gateway into all OpenAI Generative AI functionalities from your programs.
